PROFESSIONAL SUMMARY

Second-year Computer Science student specializing in Front-End Development. Proficient in HTML and CSS, with active ongoing learning in JavaScript. Leverages a strong academic background in OOP, data structures, and algorithms to build clean, responsive web interfaces. Seeking an entry-level role or internship to contribute to real-world projects and accelerate my technical growth.

Projects & Experience

Front-End Developer (Academic Team Project) | Youth Clothing E-Commerce

- Collaborated with a development team to build a complete e-commerce website for youth clothing.
- Designed and structured the user authentication interfaces, taking full responsibility for developing the Login and Logout pages using HTML and CSS.

TECHNICAL SKILLS

- Programming & Markup:** HTML, CSS, JavaScript, Java, Python
- Concepts & Tools:** Object-Oriented Programming (OOP), Data Structures, Data Analysis
- Core Competencies:** Time Management, Teamwork, Problem Solving

EDUCATION

Bachelor of Computer Science

- Culture & Science City (CSC) **Expected Graduation: 2028**
- Core Coursework: Data Structures, Algorithms Analysis and Design, Object-Oriented Programming (OOP), Introduction to Database, and Software Engineering I.

Technical Learning | Culture & Science City (CSC)

- Successfully completed technical training courses in Python I, Python II, and Data Analysis.
- Currently enrolled in practical training for Problem Solving with C++.
